Frontiers in Complex Metallic Alloys

Supporting Organization

October 1 - 4, 2008
Institute of Physics

Scientific/Financial Support

Zagreb, Croatia

Scope

The workshop will provide an opportunity to learn about the latest results in the field of complex metallic alloys (CMA) and related materials, and plenty of time for discussion of various aspects of the field. Abstracts are invited in all areas of CMA studies including, but not limited to, synthesis, crystal growth, structure, surfaces and thin films, physical properties, theory, applications and new frontiers of cluster-based complex metallic alloys and related materials.

Workshop Venue

The workshop will take place at the Institute of Physics. The Institute is situated about two kilometres uphill, north of the City centre. A bus (No 106, 201, 226 and 238) from Kaptol (the Cathedral area) to the Institute leaves at least every fifteen minutes.

Getting to Zagreb

Croatia Airlines and several other operators provide direct flights from a number of cities in Europe to Zagreb international airport <http://www.zagreb-airport.hr/>.

About Zagreb

Zagreb is the capital of Croatia and an old Central European city. It is located at the intersection of several important routes between the Adriatic coast and Central Europe with an international airport. Zagreb offers its guests the Baroque feel of the Upper town, picturesque open-air markets, various kinds of shops and delicious local cuisine.

Local Organizing Committee
